AT the solicitation of many teachers who have desired to introduce into their schools a symmetrical and systematic series of Gymnastic exercises, this Manual, consisting merely of practical exercises, has been prepared.

The utility and practicability of physical exercises in our schools are becoming more and more evident.

No attempt has been made to describe the physiological effect of the different positions; the book being merely what it purports to be, a *Manual of Exercises*, so arranged that pupils can perform them, changing from one position to another in exact time, without dictation from the teacher.

The exercises are such as have been practised in this school, with much pleasure and profit, the past two years. They are arranged in the order in which they have been performed; one position fol-

lowing another easily and naturally. The first series can be practised as a whole, including both sitting and standing positions, or any part of them taken consecutively, as the teacher may choose.

Pupils take much more interest and delight in physical exercises, when they know how many times each position is to be taken, when to change to another position, and what that position is to be; and it is certainly easier and more pleasant for the teacher.

Music will add much to the interest and utility of the exercises. The first series can be taken to such tunes as "Glory Hallelujah," "Hail Columbia," "Yankee Doodle," or any tune of marked measure. Keep pupils cheerful; let, or even *make*, them laugh, and enjoy the exercises as much as possible. The exercises are taken uniformly three times each; viz. right member, three times; left, three times; both, three times; alternate, three times each. They can be extended by increasing the number of times each position is taken.

I have been induced to write out the exercises used in this school solely from the desire to hasten if possible the introduction of gymnastic, or calisthenic training into our public schools, feeling that

it was not from the want of positions or works on gymnastics that physical exercises are not generally introduced into our schools, but because teachers have not the time or inclination to select, from the detached illustrations and explanations in books already published, a symmetrical series of positions which should be interesting and profitable.

Having selected from various sources positions as they have appeared in detached illustrations, and added new ones, I have arranged them so that one position naturally follows another, both pleasant to the eye of the spectator, and agreeable, easy, and profitable to the pupil. I submit these exercises to the judgment of teachers, as they have borne the best of all tests, *actual trial in the school-room*; hoping that, if *these* exercises are not adopted, other and more varied ones will be, and that physical exercises will be practised in all our schools, and that we may be able "to turn out" from our schools better specimens of a noble race.

MANUAL.

SITTING POSITIONS.

1. Sit erect with arms folded.
2. Body thrown forward with folded arms on desk.
3. Arms extended on desk in front parallel.
4. Sit erect, shoulders thrown back with arms hanging by side.
5. Head resting on right hand with right elbow on desk.
6. Head resting on left hand with left elbow on desk.
7. Head resting on both hands with both elbows on desk.
8. Head resting on both hands with hands on desk.
9. Sit erect, shoulders down, elbows thrown back as far as possible, with forearm horizontal, hands tightly closed.
10. Right arm thrown horizontally in front and back to position 9 three times.
11. Left arm thrown horizontally in front and back to position 9 three times.

12. Both arms thrown horizontally and parallel in front and back to position 9 three times.
13. Hands thrown forward in front, alternately, and back to position 9, three times each.
14. Both arms extended horizontally and parallel in front.
15. Twist arms as in boring with gimlet, hands tightly closed, three times.
16. Open and close hands three times.
17. Strike hands together three times.
18. Arms in front, forearm perpendicular, upper arm horizontal.
19. Right arm perpendicular and back to position 18 three times.
20. Left arm perpendicular and back to position 18 three times.
21. Both arms perpendicular and back to position 18 three times.
22. Arms alternately perpendicular and back to position 18 three times.
23. Both arms perpendicular.
24. Twist arms as in 15, arms perpendicular.
25. Hands together over head three times.
26. Hands upon each other on top of head.
27. Right arm up sidewise at an angle of 45° and back to position 26 three times.
28. Left arm up sidewise at an angle of 45° and back to position 26 three times.
29. Both arms up sidewise at an angle of 45° and back to position 26 three times.

30. Arms up alternately sidewise at an angle of 45° and back to position 26 three times.
31. Both arms extended up at an angle of 45° .
32. Snap fingers.
33. Strike hands together over head three times.
34. Sit erect, arms folded, as in No. 1.
35. Sit erect, arms folded, right face.
36. Stand.
37. Stand erect, arms folded, left face.

The pupil is now ready to commence the standing positions without interruption, or the standing positions may be taken as a separate exercise, as they must be, unless pupils are in the school-room with desks.

STANDING POSITIONS.

1. At the command, Position, the pupil will stand with heels on the same line, feet turned out equally, forming with each other an angle of 45° ; the knees straight; body erect; shoulders square and falling equally; arms hanging naturally by side; elbows near the body; the palm of the hands turned a little to the front; head erect; eyes looking directly forward; thus bringing the ear, shoulders, hip, knee, and ankle into a straight line. Fig. 1. The head, body, and feet should be kept in this position throughout the exercises unless otherwise ordered.
 2. Strike chest with closed hands. Fig. 2 (*d*).
 3. Arms extended horizontally sidewise. Fig. 2 (*c*).
 4. Same as in No. 2. Fig. 2 (*d*).
 5. Arms extended perpendicularly. Fig. 2 (*b*).
 6. Same as in No. 2. Fig. 2 (*d*).
 7. Arms extended horizontally and parallel in front. Fig. 8 (*b*).
 8. Same as in No. 2. Fig. 2 (*d*).
- Repeat the preceding positions three times.

Fig. 1.

Fig. 2.

These positions will serve to unite many other positions ; hence they will often be referred to and repeated. Always perform them with full lungs.

9. Position as in No. 1. Fig. 1.
10. Right arm up and back to No. 9 three times in four motions, viz. : first, elbow at hip with closed hand at shoulder, back of hand in front, Fig. 3 (a) ; second, arm thrown up perpendicularly, Fig. 3 (b) ; third, hand brought to shoulder, same as first, Fig. 3 (a) ; fourth, by turning thumb towards the body, throw the hand down close to the body, as

far as possible without lowering the shoulder.

Fig. 3 (c).

11. Left arm up three times in four motions, like right arm in No. 10. Fig. 3.
12. Both arms together, up three times in four motions, like right arm in No. 10. Fig. 3.
13. Arms up alternately three times each, as in No. 10. Fig. 3.
14. Position No. 1. Fig. 1.
15. Right shoulder up three times. Fig. 4.
16. Left shoulder up three times. Fig. 4.
17. Both shoulders up three times. Fig. 4.
18. Shoulders up alternately, three times each. Fig. 4.

19. Same as No. 1. Fig. 1.
20. Hands on chest, as in No. 2. Fig. 2 (*d*).
21. Arms extended horizontally sidewise, as in No. 3. Fig. 2 (*c*).
22. Twist arms three times, as in boring with a gimlet. Fig. 5.

Fig. 5.

23. Open and close hands three times. Fig. 6.
24. Same as No. 1. Fig. 1.
25. With closed hands strike chest, as in No. 2. Fig. 2 (*d*).
26. Arms extended horizontally sidewise, as in No. 3. Fig. 2 (*c*).
27. Hands on chest, as in No. 25. Fig. 2 (*d*).
28. Arms extended perpendicularly. Fig. 2 (*b*).

The preceding exercises are supposed to be taken,

Fig. 22.

the pupil standing by side of his desk in the school-room. Should the exercises be taken out of the school-room, arrange the pupils in lines, so that the pupil can lay his hand on the shoulders of the one before him; shortest in front; lines close together. Let every other line advance one half pace, so that the arms, when raised horizontally sidewise, shall not interfere with each other. The closer the pupils are together, the better the effect. The tendency of all the exercises should be to expand the chest, and keep the shoulders down and back.

AN EXERCISE

ADAPTED TO ANY TUNE IN TRIPLE MEASURE.

1. Position. Fig. 1.

At the sound of the bell, snap of the finger, nod of the head, or any signal from the teacher, the pupil will advance right foot three paces, of a foot each, body resting on the left foot.

2. Fill lungs, and bring hands, closed, energetically to chest. Fig. 24 (a).

Fig. 24.

Repeat the following three times :

3. First, throw right hand directly in front, arm horizontal. Fig. 8 (*b*).
4. Second, swing arm to the right, horizontally, as far as possible, without moving the body. Fig. 24 (*b*).
5. Third, right hand, closed, on chest. Fig. 24 (*a*).

Repeat the following three times :

6. First, left hand thrown directly in front, arm horizontal. Fig. 8 (*b*).
7. Second, swing left arm horizontally to the left as far as possible, without moving body. Fig. 24 (*c*).
8. Third, left hand, closed, on chest. Fig. 24 (*a*).

Repeat the following three times :

9. First, both hands directly in front, arms horizontal and parallel. Fig. 8 (*b*).
10. Second, swing both arms horizontally as far as possible without moving the body ; right arm to the right, left to the left. Fig. 24 (*b* and *c*).
11. Third, both hands, closed, on chest. Fig. 24 (*a*).

Repeat, alternately, three times each :

12. Right hand and arm as in 3, 4, and 5.
13. Left hand and arm as in 6, 7, and 8.
14. Position.

The preceding exercise may be varied by advancing left foot instead of right; also by extending arm up at an angle of 45° instead of horizontally. Fig. 24 (*d* and *e*).

AN EXERCISE

FOR ANY TUNE IN DOUBLE MEASURE.

1. Position, except feet together and parallel.
At any given signal the pupil will advance right foot four paces, of a foot each, or less if necessary, throwing the body on right foot; face directly over the foot in advance.
2. Fill lungs, and throw elbows as far back as possible, forearm horizontal, hands tightly closed.
Fig. 25 (a).

Fig. 25.

Repeat the following three times :

3. First, throw right hand directly in front, arm horizontal. Fig. 25 (b).
4. Second, bring right hand by side, forearm horizontal. Fig. 25 (a).

Repeat the following three times :

5. First, throw left hand directly in front, arm horizontal. Fig. 25 (b).
6. Second, bring left hand by side, forearm horizontal. Fig. 25 (a).

Repeat the following three times :

7. First, hands together in front, arms horizontal and parallel. Fig. 25 (b).
8. Second, hands by side, forearm horizontal. Fig. 25 (a).

Repeat alternately three times each :

9. First, throw right hand as in 3. Fig. 25 (b).
10. Second, bring right hand as in 4. Fig. 25 (a).
11. First, throw left hand as in 5. Fig. 25 (b).
12. Second, bring left hand as in 6. Fig. 25 (a).

Vary the exercise by advancing left foot, throw hand perpendicular, Fig. 25 (d), or up at an angle of 45°. Fig. 25 (c).

BREATHING EXERCISE.

1. Inhale and exhale the breath through the nose three times very slowly, without raising and lowering the shoulders.
2. Inhale and exhale the breath through the nose three times rapidly.
3. Inflate lungs through the nose, then strike right lung rapidly with both hands.
4. Inflate lungs through the nose, then strike left lung rapidly with both hands.
5. Hands on hips, inflate lungs as much as possible ; emit the breath with the utmost slowness.
6. Draw in the breath as in No. 5, and expire it audibly through the mouth, as in the prolonged sound of the letter K.
7. Inflate the lungs as in No. 5, then force the breath through the mouth in the manner of an abrupt and whispered cough.
8. Fill the lungs as in No. 5, then emit the breath as quickly as possible, as in giving the aspirated sound of the letter H.
9. Fill lungs through the mouth ; force the breath through the nose.

10. Breathe as rapidly as possible through the nose, mouth closed.
11. Breathe through the mouth as rapidly as possible, like panting.
12. Inflate lungs to their utmost capacity, then, at a given signal, explode the sounds of the vowels. Fill lungs before each sound.
13. After fully inflating the lungs, give the radical, median, vanishing, compound, thorough, and tremulous stress of each vowel sound. Fill lungs before each sound.

EIGHT POSITIONS

FOR ANALYZING AND SPELLING WORDS.

Stand erect, arms folded, the word to be distinctly pronounced by pupil before changing position. Let the pupil only mention the letters without pronouncing syllables.

1. Elbows thrown violently back as far as possible, forearm horizontal. Fig. 26 (a).
2. Throw arms horizontal and parallel in front. Fig. 26 (b).
3. Bend arms at elbow, forearm perpendicular, upper arm horizontal. Fig. 26 (c).
4. Arms thrown up perpendicular. Fig. 27 (a).
5. Hands together over head. Fig. 27. (b).
6. Same as No. 1.
7. Hands thrown down by side as far as possible without lowering shoulders. Fig. 2 (a).
8. Arms folded.

These positions to be repeated to correspond to the number of letters or sounds required.

The sounds of the vowels and alphabet, the analysis and spelling of long words, the musical scale with

Fig. 26.

Fig. 27.

one, two, or more sounds to each position, may be given; also, the humming and singing of tunes, repeating long lists of words, such as lists of prepositions and conjunctions, battles of the Revolution, Kings of England, rivers, capes, bays, &c., &c. In analyzing words, pronounce the syllables.

Another very agreeable and useful exercise for the vocal organs is the repetition of the vowel sounds with positions, so that the first and each alternate sound shall be accented, and each accented sound dwelt upon as long as two unaccented, the positions made to conform to the time and accentuation of each vowel.
